NG – M16DC-\_\_-\_\_ (See Chart below)

## 3 Watt LED MR16 Low Voltage Lamp – Non-Dimmable

### APPLICATIONS

- General Illumination
- Recessed Cans
- Track lighting
- Spotlight
- Pendants
- Flood Lights

### Warranty

3 Year Warranty.

Powered by:

30° beam angle

45° beam angle

- Bi-Pin base 3 watt MR16 LED Lamp
- Up to 800 footcandles
- Efficiency rating up to 26 lumens per watt
- CRI > 80
- Warm White (3000K)  
Pure White (6500K)
- Lifetime expectancy of 35,000 hours

Part Number	Color	LED Type & Qty	View Angle	Work Voltage	Optic	Power	Wavelength	Footcandles	Base	Packing
NG-M16DC-30-30K	Warm White	1-3W	Spot	12VAC/VDC	30 degree	3W	3000K	650	GU 5.3 Bi-Pin	12 pack
NG-M16DC-30-65K	Pure White	1-3W	Spot	12VAC/VDC	30 degree	3W	6500K	800		
NG-M16DC-45-30K	Warm White	1-3W	Spot	12VAC/VDC	45 degree	3W	3000K	580		
NG-M16DC-45-65K	Pure White	1-3W	Spot	12VAC/VDC	45 degree	3W	6500K	730

### Quality

Next Gen Illumination, Inc. provides a limited 3 year warranty on Lamp replacement. Disassembly of product voids any and all warranty obligations from Next Gen Illumination, Inc.

These lamps will not function in multi-level switching.

Not rated for exterior use.

### Performance

Next Gen Illumination technology focuses on the key components for quality assurance. It all starts with using the highest quality LEDs with optimum heat dissipation. Using good LEDs is just the start of a great light

The final aspect of a quality light is getting the light where it is supposed to go. Optics control is key for high performance lighting. Our engineered focus optics are designed to produce useable light on the work plane without having to add additional light for safety standards.

### Price

At Next Gen Illumination, we have always asserted that it is not only enough to produce a quality product that has the highest performance but to deliver it at a price that is driven by ensuring rapid returns on investment while minimizing installation costs. This is why we have pursued the conversion/replacement market. This is the surest method of controlling installation cost. No rewiring, no additional controls and no outside labor cost. It's as easy as changing a light bulb. The true cost of lighting can only be measured in terms of combined energy consumption, maintenance, lamp replacements and disposal costs. It is what we like to call, "The True Cost of LEDs".
